Art Unit: 1742

1. The Examiner has carefully considered Applicant's Response of 1/18/05. The Examiner finds that the amendment of 1/18/05 frees the claims of the prior rejection, the prior art rejection not providing for the container limitation. At this time, the Examiner makes a new rejection necessitated by Amendment which is accordingly made final.

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
- 4. Claims 1-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Saito et al.

Saito et al. discloses the invention substantially as claimed. Saito et al. discloses a method of forming a sintered body comprising:

Application/Control Number: 10/810,673

Art Unit: 1742

providing a titanium powder (col. 3, line 59);

providing an additional alloying powder selected from a group comprising a Group V element to form an alloy powder mixture; and

sintering the alloy powder mixture to form a sintered body.

Saito et al. further discloses wherein the sintered body is formed by hipping at temperatures and pressures that overlap those as claimed by Applicant (col. 15, lines 16-30).

Saito discloses with sufficient specificity ranges that overlap and closely approximate the claimed process limitations of the pending claims which establishes a prima facie case of obviousness (See MPEP 2131.03).

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Application/Control Number: 10/810,673

Art Unit: 1742

the advisory action. In no event, however, will the statutory period for reply expire later

Page 4

than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Daniel J. Jenkins whose telephone number is 571-272-

1242. The examiner can normally be reached on M-TH6:30AM-5:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Roy King can be reached on 571-272-1242. The fax phone number for the

organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free).
